

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning on page 3, line 3, as follows:

The digital phone 60 further has a transceiver 61, buttons 62, and a display 63. The LAN 20 connecting the thin client 10 and the ISP 30 can be a cable modem or an asymmetric digital subscriber line (ADSL) modem. Through the Ethernet network protocol, the above-mentioned thin client 10 is then equipped with the online function.
